SPOT SPRAYER

Very sturdy, versatile Spot Sprayer is also suitable in conjunction with boom spraying. Comes complete with battery connections. High quality adjustable lance. Two tie down straps. Tank has 4x8mm insets on bottom for stable mounting if necessary. Standard lance has 2 meter hose. Extra long hose available as optional.

Features:

- 75 litre tank capacity
- 12 volt DC operation
- Automatic pressure regulated pump head to give spray on demand
- Automatic volume control relative to demand

SPRAY BOOMS—3M FOLDING BOOM

Make better use of your sprayer with a 3 meter Spray Boom for those bigger spraying jobs. Seven filtered fan tips with diaphragm anti-drips on half metre centres spray generous 3.6 metre wide pattern.

Adjustable spring-loaded arms flex back to pass objects, then immediately return to straight out position, allowing you to get close to obstacles without damaging any part of the sprayer.

Outer sections of the boom fold back to the centre for transport making the unit a compact 1.2m wide.

Each boom is fully adjustable for height and is supplied with a multi use fixing kit which will fit to the rear shelf of an ATV or can be adapted for use with other machines. These booms are manufactured to a very high standard, have a powder coated finish, top quality fittings and we strongly recommend them.

Optional taps are available to shut off the outer boom section.

Shut-off valves may be added to control outer sections.

The nozzle is enclosed in the boom section to help prevent breakages.
