POLE ERECTOR

This is an attachment to erect large transmission poles in rugged terrain. It simply replaces the JCB (Tractor Loader Backhoe) front bucket. It can be used for handling, setting and removing poles. It is in use for 35 years all over Europe and North America and it is the answer to the linemans dream.

Specifications:

- Working Load Limit 1.2 Tonnes
- Maximum Pole Length 18m
- Maximum pole diameter 350 mm
- Safety Chains 1.2 Tonnes
- Quick attach Made and fitted to order
- Weight 650 kg
- Dimensions Length 1.40 m
Width 0.80 m
Height 1.47 m
- Hydraulic Connections 3 in 1
